HOBBIES

ABOUT

A lover of all media digital. A passion for development, focused on data-driven results and industry best-practices for a seamless user experience. Ambitious developer and designer with 10+ years experience solving problems in the digital space. Emphasis on a harmony between ease of use, real-world application, and necessary complexity. Proven success in increasing customer retention and stakeholder satisfaction with personally suggested implementations and changes. Hardworking, resourceful, and a real professional problem solver.

WORK EXPERIENCE

Senior Front-End Web Developer

Smartsheet | September 2021 - Present

Translating of UI/UX designs to code that translate to visual elements of web-based applications. Collaborating with visual designers to bridge the gap between design and technical implementation, taking an active role on both sides and defining how the application looks as well as how it works.

- Collaborating cross-team with marketing, developers, and stakeholders to implement sitewide changes
- Communicate highly complex ideas and concepts to peers and non-technical business partners
- Utilize design and problem-solving skills, with a focus for quality and engineering excellence at scale
- Create and apply metrics to drive the quality and stability of code, as well as appropriate reusable patterns and best practices
- Evangelize adherence and adoption of software engineering best practices within the team

Software Engineer/Front-End Developer

Zoominfo | December 2020 - September 2021

Developing front end applications while helping build and architect applications in the low code environment. Interacting with stakeholders to understand the User Experience (UX) goals of the business requirements, provide clients with pertinent feedback to understand how to design user interfaces (UI) to meet the business needs within the OutSystems platform. Developing core functional components, processes and integrations.

Front-End Web Developer

K2 | June 2019 - December 2020

Working within K2's proprietary CMS creating modular, reusable internal web applications for both the user-facing K2 website as well as admin tools utilized throughout the company. Designer and facilitator of new internal CMS features used throughout the admin site, including thorough documentation of the added utilities.

EDUCATION

University of Washington

Bachelor's of Science | September 2010 - June 2014
